Membership In CFSA:

Our lender membership is comprised of companies actively engaged in either automobile sales contracts, retail sales contracts, small personal loans of both secured and unsecured, real estate secured financing, and credit card issuing. All members operate in California. **Dues are based upon a formula (see page 3 of the application). For publically traded national and international companies the minimum dues are \$1000 and the maximum dues are \$25,000 per year.**

The minimum dues for a single focused, independently owned, non-publically traded company is \$1000 plus \$500 for our Independent member services. The maximum dues are \$5000 per year, plus an additional \$500 for our Independent member services. (See below)

Independent Section Members are non-publically traded, entrepreneurial lending institutions. The Independent Section is a sub-organization of CFSA and is designed to promote issues, which most affect the small lender. The Independent Section affords its members frequent opportunities to network and exchange ideas with colleagues in the industry at meetings, owner's workshops, and management training seminars. **State Association membership is a prerequisite when joining the Independent Section. *Independent Section Dues are \$500 per year as indicated above.***

Associate Members are the support vendors who supply CFSA Members with the services necessary to stay in business. Associates typically provide insurance, accounting, printing, legal services, credit lines, and data processing. **Associates Member dues are \$750 per year.**
